

# Test Closure Plan

## 1. Introduction

This Test Closure Plan summarizes the final testing activities for the banking application project. It reviews the outcomes of the testing phase and provides an assessment of whether the application meets the established quality standards and is ready for deployment.

## 2. Test Summary

The following summarizes the testing efforts:

- Total Test Cases Executed: 120
- Total Defects Found: 15
- Defects Resolved: 15
- Remaining Open Defects: 0

All critical defects have been resolved, and no blocking issues remain.

## 3. Test Case Coverage

The test case coverage is as follows:

- Functional Coverage: 95%
- Non-functional Coverage (Performance, Security): 90%

The remaining untested cases were either low-risk features or out of scope.

## 4. Defect Summary

The following provides a breakdown of defects:

- High Severity: 5 (Resolved)
- Medium Severity: 7 (Resolved)
- Low Severity: 3 (Resolved)

No high or medium severity defects remain unresolved.

## 5. Handover and Deliverables

The following documents are provided as part of the test closure:

- Final Test Summary Report

- Defect Logs
- Test Case Results

These documents will be shared with the project stakeholders for review and approval.

## **6. Conclusion**

Based on the results of the testing process, the application has met all quality requirements. All critical defects have been resolved, and the system is stable. The testing phase is now complete, and we recommend proceeding with deployment.
